## ABSTRACT

### Keywords

ACM proceedings, L<sup>A</sup>T<sub>E</sub>X, text tagging

## 1. INTRODUCTION

*todo: Write stuff in the intro*

## 2. BACKGROUND

### 2.1 The Tree Structure

### 2.2 The Four Steps of MCTS

### 2.3 The Upper Confidence Bound(UCT)

## 3. USING MCTS TO PLAY GO

### 3.1 Variations in Their MCTS Algorithm

### 3.2 Their Results

## 4. USING MCTS FOR NARRATIVE GENERATION

### 4.1 Variations in Their MCTS Algorithm

### 4.2 Their Results

## 5. USING MCTS TO PLAY MARIO

### 5.1 Variations in Their MCTS Algorithm

### 5.2 Their Results

## 6. CONCLUSIONS

## 7. ACKNOWLEDGEMENTS

## 8. REFERENCES

### 8.1 Citations

Citations to articles [?, ?, ?] listed in the Bibliography section of your article will occur throughout the text of your article. You should use BibTeX to automatically produce this bibliography; you simply need to insert one of several citation commands with a key of the item cited in the proper location in the .tex file [?]. The key is a short reference you invent to uniquely identify each work; in this sample document, the key is the first author's surname and a word from the title. This identifying key is included with each item in the .bib file for your article.

The details of the construction of the .bib file are beyond the scope of this sample document, but more information can be found in the *Author's Guide*, and exhaustive details in the *L<sup>A</sup>T<sub>E</sub>X User's Guide*.

This article shows only the plainest form of the citation command, using \cite. This is what is stipulated in the SIGS style specifications. No other citation format is endorsed or supported.
